# SMARTGOV FOR HEALTH

COMPUTER AIDED DISPATCH

Revolutionise emergency response with SmartGov's Computer Aided Dispatch. Streamline operations, enhance efficiency and improve patient outcomes through seamless integration and advanced technology.

Automate ambulance dispatch, optimise routes and empower field personnel with real-time information for quicker, more effective emergency response.

KEY FEATURES

Web-Based Solution
Integrate with PBX for efficient call routing, incident management and fleet tracking from a central platform.

Mobile Responder Application
Equip EMS teams with real-time incident details, navigation and communication tools for enhanced situational awareness.

Patient Engagement Platform
Empower citizens to request ambulances directly through a user-friendly platform, reducing call volume and improving accessibility.

Facial Recognition Log-on
Enhance security and prevent system misuse with advanced facial recognition technology.
